**Supplementary Figure 3.** Kaplan-Meier curves for progression-free survival (panels A, B and C) and overall survival (panels D, E and F) according to NLR, dNLR and REC at 4 weeks. Yellow lines indicate patients with high indexes while blue lines indicate patients with low indexes.

- **Panel A:** NLR ≥ 5
  - HR 1.88 (95% CI 1.31-2.70)
  - *P* < .001
- **Panel B:** dNLR ≥ 3
  - HR 1.97 (95% CI 1.35-2.86)
  - *P* < .001
- **Panel C:** REC ≥ 1.5
  - HR 0.63 (95% CI 0.44-0.90)
  - *P* = .01
- **Panel D:** NLR ≥ 5
  - HR 2.53 (95% CI 1.66-3.86)
  - *P* < .001
- **Panel E:** dNLR ≥ 3
  - HR 2.61 (95% CI 1.70-4.01)
  - *P* < .001
- **Panel F:** REC ≥ 1.5
  - HR 0.54 (95% CI 0.36-0.82)
  - *P* = .004
